Problem-Solution fit canvas 2.0

Purpose / Vision: Finding Your Perfect Rental Home

Define CS, fit into	1. CUSTOMER SEGMENT(S) CS - Students looking for rental accommodation - Working professionals relocating to new cities - Families searching for rental houses - Property owners who want to rent their houses - Admin who manages platform operations	6. CUSTOMER CONSTRAINTS CC - Limited budget - Lack of trust in online platforms - Limited internet access - Limited technical knowledge - Fear of online fraud - Lack of verified information	5. AVAILABLE SOLUTIONS AS - Local brokers / agents - Social media property groups - Newspaper classifieds - Word-of-mouth references - Real estate websites	Explore AS,									
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Direct Problems: - Find verified rental properties - Post rental property easily - Manage property availability - Book rental properties securely - Avoid broker commission Indirect Problems: - Save time during house search - Avoid fraudulent listings - Maintain digital records of properties and bookings - Improve communication between owner and renter	9. PROBLEM ROOT CAUSE RC - Unorganized rental market - Lack of centralized digital system - Heavy dependency on middlemen - No secure role-based verification - Information asymmetry between owners and renters The rental system is largely fragmented and broker-driven, which increases cost and reduces transparency.	7. BEHAVIOUR BE Online: - Search properties on Google - Browse Facebook / WhatsApp groups - Visit rental websites - Compare prices online Offline: - Contact local brokers - Visit properties physically - Ask friends and relatives - Check newspaper advertisements		Focus on J&P, tap into BE, understand								
Identify strong TR & EM	3. TRIGGERS TR - Relocation due to job or education - Expiring rental agreement - High broker commission charges - Urgent need for accommodation	10. YOUR SOLUTION SL HouseHunt is a MERN stack-based web application that provides: - Secure user authentication (JWT) - Role-based dashboards (Admin / Owner / Renter) - Property listing and management - Booking system - Centralized database (MongoDB) - REST API backend (Node.js & Express) - Responsive frontend (React.js) It eliminates brokers, reduces fraud, and provides a centralized rental management platform.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE - Web browsers - Social media platforms - Real estate websites - Mobile internet 8.2 OFFLINE - Brokers - Newspaper classifieds - Word-of-mouth - Direct property visits	Extract online & offline CH of BE									
	4. EMOTIONS: BEFORE / AFTER EM <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Before</th> <th style="text-align: left;">After</th> </tr> </thead> <tbody> <tr> <td>Confused</td> <td>Confident</td> </tr> <tr> <td>Frustrated</td> <td>Secure</td> </tr> <tr> <td>Insecure about fraud</td> <td>In Control</td> </tr> <tr> <td>Financially stressed due to broker fees</td> <td>Satisfied</td> </tr> <tr> <td>Time Pressure</td> <td>Relieved</td> </tr> </tbody> </table>	Before	After		Confused	Confident	Frustrated	Secure	Insecure about fraud	In Control	Financially stressed due to broker fees	Satisfied	Time Pressure
