## Project Overview:

Project Name: HouseHunt - Finding Your Perfect Rental Home

## Project Description:

HouseHunt is a MERN stack-based web application designed to connect property owners and renters through a secure and centralized digital platform. It provides role-based authentication, property management, booking functionality, and administrative monitoring.

Project Version: v1.0

Testing Period: 12 February 2026 to 17 February 2026

## Testing Scope:

### Features and Functionalities Tested:

- User Registration
- User Login (JWT Authentication)
- Role-Based Access Control
- Add Property (Owner)
- Update & Delete Property
- View All Properties (Renter)
- Booking Functionality
- Admin Dashboard Access
- API Integration
- UI Navigation & Responsiveness

### User Stories Tested:

- USN-1 to USN-19 (as defined in Product Backlog)
- Authentication & Authorization Stories
- Property Management Stories
- Booking & Dashboard Stories

**Testing Environment:**

URL/Location: <http://localhost:3000/>

Backend API:

<http://localhost:5000/api>

**Credentials (for testing):**

Owner Login:

Email: owner@test.com

Password: 123456

Renter Login:

Email: renter@test.com

Password: 123456

Admin Login:

Email: admin@test.com

Password: 123456

**Test Cases:**

| Test Case ID | Test Scenario                | Test Steps                                                           | Expected Result                   | Actual Result                    | Pass/Fail |
|--------------|------------------------------|----------------------------------------------------------------------|-----------------------------------|----------------------------------|-----------|
| TC-001       | User Registration            | 1. Open Register page<br>2. Enter valid details<br>3. Click Register | User account created successfully | Account created and stored in DB | Pass      |
| TC-002       | Login with Valid Credentials | 1. Enter correct email & password<br>2. Click Login                  | User logged in & token generated  | Login successful                 | Pass      |
| TC-003       | Login with Invalid Password  | 1. Enter wrong password<br>2. Click Login                            | Error message displayed           | Proper error shown               | Pass      |
| TC-004       | Owner Add Property           | 1. Login as Owner<br>2. Fill property form<br>3. Submit              | Property saved in database        | Property added successfully      | Pass      |
| TC-005       | Owner Update Property        | 1. Edit property details<br>2. Click Update                          | Property updated                  | Property updated correctly       | Pass      |

|        |                              |                                                  |                                             |                                            |      |
|--------|------------------------------|--------------------------------------------------|---------------------------------------------|--------------------------------------------|------|
| TC-006 | Owner<br>Delete<br>Property  | 1. Click delete<br>button                        | Property<br>removed                         | Property<br>removed<br>from DB             | Pass |
| TC-007 | Renter<br>View<br>Properties | 1. Login as Renter<br>2. Open property list      | All<br>available<br>properties<br>displayed | Properties<br>displayed<br>correctly       | Pass |
| TC-008 | Renter<br>Book<br>Property   | 1. Click Book<br>2. Confirm booking              | Booking<br>stored &<br>status<br>updated    | Booking<br>successful                      | Pass |
| TC-009 | Unauthoriz<br>ed Access      | 1. Try accessing<br>owner route without<br>login | Access<br>denied                            | Proper<br>authorizati<br>on error<br>shown | Pass |
| TC-010 | JWT<br>Token<br>Validation   | 1. Use invalid token                             | Access<br>denied                            | Token<br>validation<br>working             | Pass |

#### Bug Tracking:

| Bug ID | Bug<br>Description                                       | Steps to reproduce                                          | Severity | Status | Additional<br>feedback            |
|--------|----------------------------------------------------------|-------------------------------------------------------------|----------|--------|-----------------------------------|
| BG-001 | UI<br>alignment<br>issue on<br>Add<br>Property<br>page   | 1. Open Add<br>Property page<br>2. Resize browser<br>window | Low      | Closed | Fixed with<br>CSS<br>adjustment   |
| BG-002 | Error<br>message<br>not clear<br>during login<br>failure | 1. Enter wrong<br>credentials                               | Medium   | Closed | Improved<br>validation<br>message |
| BG-003 | Property<br>status not<br>updating<br>immediately        | 1. Book property<br>2. Refresh<br>dashboard                 | Medium   | Closed | Fixed API<br>refresh<br>issue     |
