

Project Design Phase-II

Data Flow Diagram & User Stories

Date	09 February 2026
Team ID	LTVIP2026TMIDS82993
Project Name	HouseHunt: Finding Your Perfect Rental Home
Maximum Marks	4 Marks

Data Flow Diagrams:

◆ DFD Level 0 (Context Diagram)

Description:

DFD Level 0 represents the overall system as a single process interacting with external entities.

External Entities:

1. Owner
2. Renter
3. Admin

Central Process:

- HouseHunt System

Data Flows:

- Owner → Property details → System
- Renter → Booking request → System
- Admin → Monitoring requests → System

DFD Level 0: HouseHunt System

- System → Property listings → Renter
- System → Booking details → Owner
- System → User details → Admin

Data Storage:

- Users Database
- Properties Database
- Bookings Database

◆ DFD Level 1 (Detailed Flow)

Level 1 breaks the system into main processes.

Process 1: User Management

- Input: Registration data / Login credentials
- Process: Validate user → Hash password → Generate JWT
- Output: Authentication token
- Data Store: Users Collection

Process 2: Property Management

- Input: Property details (Owner)
- Process: Add / Update / Delete property
- Output: Property list
- Data Store: Properties Collection

Key Processes in the Property Rental System

Process 3: Booking Management

- Input: Booking request (Renter)
- Process: Validate availability → Store booking → Update property status
- Output: Booking confirmation
- Data Store: Bookings Collection

Process 4: Admin Monitoring

- Input: Admin request
- Process: Fetch users / properties / bookings
- Output: System overview

User Stories

Below are the user stories for HouseHunt.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
